

I wanted to give you a little extra note about Dr. Dan Fridh and his program, Operation Stand Down.

Last year, I was honored to help out with this program in May at the Indiana University Northwest Campus in Gary. The veterans were so grateful and happy to have these services provided to them. Many could not get access to care in any other way. The volunteers also really enjoyed their experience with this program since they were able to provide services to patients that are truly in need of dental care and were not hesitant to express their gratitude. We are honored to have a dentist like Dr. Dan Fridh as part of our Dental Society and to be able to call him a friend is a true gift.

Thank you for taking the time to speak with him and gain exposure for this amazing program.

I hope you are well and safe.
