

My name is Albert Isbell, I am 72 years young. I served in the military from 1967-70. I served two overseas tours, one was South Korea, and the other was Vietnam. Both tours were a learning experience for me. After a few years past I, had health issues physically and mentally. To make a long story short I was experienced oral problems, teeth lost plus other issues. When I heard about “The Stand Down” project that appeared in the News-Dispatch newspaper. A friend of mine read it and asked me to investigate it. I didn’t think much of it, because Veterans were having a hard time readjusting to life, when it came to my health issues. My friend insisted that I check this out. To my surprise as a black male person I was well received and treated with the uttermost respect. I attended the opening events and was the first attendee in line for the love that was shown; and received. I received dental help from Dr. D.W. Fridh and his company of assistances and his team. Who instructed me and directed me in how to obtain financial help to get the equipment for my dental work, all services were donated, and now I can 😊 smile with the rest of them!!
